FLUX 3 Action: original annotation packet A5ee6df16bd49

Episode RWS-F3-S1-C01-B-D · request 1, input at tick 32 (t = 2.133 s)
33 generated frames, nominally 15 Hz · prediction only
Instruction (hidden from the labelers): “Put the rubiks cube behind the bowl”

legend.png, as given to the VLM labelers (shown at 1/2 resolution)

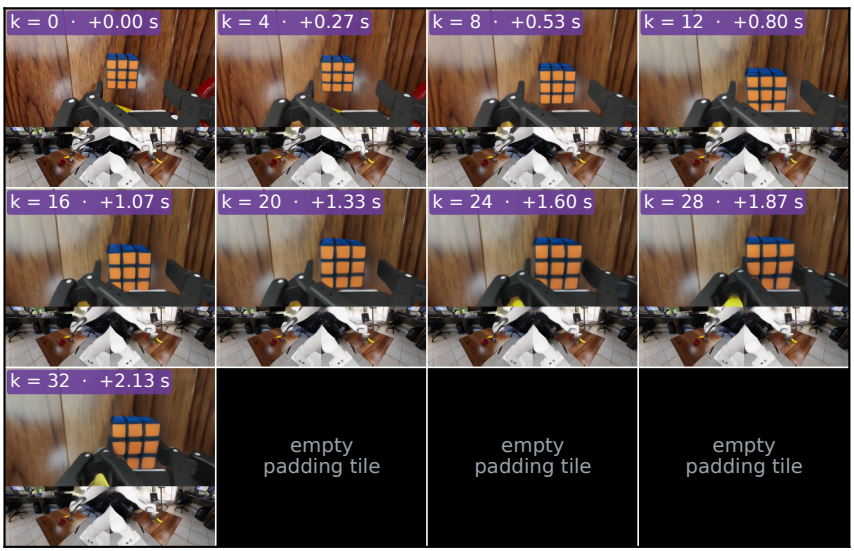

left exterior camera | right exterior camera

Episode's first observation (tick 0, before any action). 1 = banana 2 = bowl (reference) 3 = Rubik's cube (mover)

Yellow circles and numbers mark the objects; each number is drawn above and to the right of its circle, and the direction arrows are drawn over the numbers. In the left view the arrow labels cover 1 and 3, and the bowl's 2 falls beside the banana; in the right view the cube's 3 falls on the banana's circle. Both examples have byte-identical legends (same restored initial state).

contact_sheet.png, the original human-review summary (not shown to the labelers)

Tiles: generated frames k = 0, 4, ..., 32 of the request-1 forecast, every second pixel; in each, the wrist view is above the left | right exterior views.

+s is the nominal time after the request input: t = 2.133 s + k/15.

The labelers instead saw legend.png and frames k = 0, 5, 9, 14, 18, 23, 27, 32 of forecast.mkv at 640×544.

Prediction only: nothing here is paired with the execution. Frames 0, 8, 16, 24 and 32 appear with the matching executed frames in the companion figure, cut from the original future array.
